

SERVING THE CARIBBEAN & LATIN AMERICA

CetisGroup.com

At Cetis, we're constantly seeking new ways to improve guestroom telephony. Combining European style with American engineering, Cetis phones boast the highest standards of quality, durability and innovation.

TELEDEx® CONTINUING THE TRADITION.

Designed and engineered in the United States, durable, reliable and feature-rich Teledex telephones continue to be the standard by which other phones are judged.

iPhone Series

Save valuable desktop and nightstand space with the small footprint of the Teledex iPhone. Much more than just another telephone, the iPhone is the center of your communications universe, built with the same value, service and innovation you've come to expect from Teledex. RJ11 data port included on most models. Available in a variety of designer colours.

EXPRESSNET® NO-HASSLE WIRELESS.

With our new ExpressNet® AirLink, adding a high-speed wireless Internet connection to your property's existing phone system is as easy as adding and configuring an ExpressNet AirLink device to the bottom of your Cetis telephone.

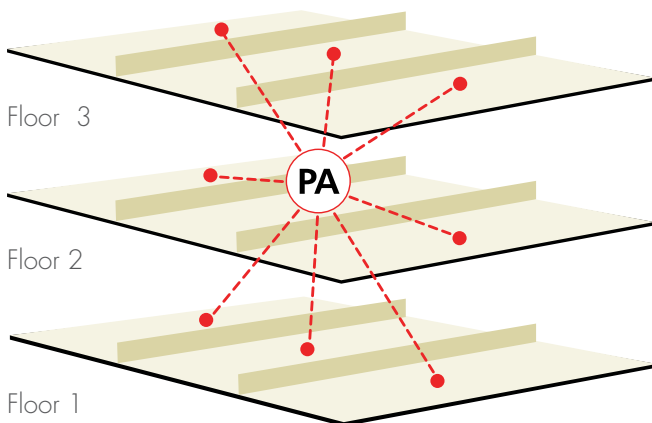

AirLink

- Combines multiple high speed interfaces in one compact guestroom device
- Wireless bridge provides convenient interface for users that aren't wireless enabled, or prefer a wired connection because of security concerns
- Easily deploy new hot spots almost instantly; no new cabling required
- Guarantees your guests will get online whether they're wireless enabled or not
- Available for the iPhone, Opal and Diamond Series telephones.

VDSL Switch

12-port VDSL switches deliver high-speed connectivity in a wide range of demanding environments, including hotels, airports and convention centers.

- Supports line power and bandwidth control
- Two-band QAM modulation
- Delivers up to 15 Mbps to each endpoint on the network (to 4,000 ft.), using standard phone wiring (CAT 2/3)
- Adjustable RF output

Wireless Access Point

To deploy WiFi access in a typical hotel, AirLink wireless access points are installed in approximately every four to six rooms, usually on alternating floors. Each access point serves rooms in its vicinity on the same floor, as well as rooms above and below.

- IEEE 802.11g compliant, up to 54 Mbps
- Adjustable RF output allows range to vary from 12.5% to 100% to decrease interference

Wall Mount Access Point

Conserve desk and counter space while eliminating messy wires with convenient wall mount kit.

Cetis, Inc., manufactures, markets and services a wide range of analog, DECT and VoIP (SIP) telephones for the hospitality industry under the Scitec, Teledex and TeleMatrix brand names.

Headquartered in Colorado Springs, Colorado, USA, we have sales/warehouse facilities in the United States, United Kingdom, China, India and Dubai. Our phones are designed and engineered in Europe and the United States, and can be found in every country of the world.

As a responsible global citizen, we strive to lead the world in quality and green hotel technology. Adhering to the strictest quality standards has earned us our ISO-9001 certification, while our RoHS certification ensures our phones are free of lead and other known environmental pollutants. Finally, we are also WEEE-certified for safe disposal of electrical parts and electronic components.

Having one source for all your telephony needs means more product options, better pricing, and unparalleled service before, during and after the sale. From economy hotels to luxurious five-star resorts, we have a phone that will perfectly match your needs. Guaranteed.
