TeleMatrix Solution Now Rated “Avaya Compliant”

- *TeleMatrix 9600IP DECT SIP cordless and 3300IP corded endpoints compatible with key Avaya Aura™ Communication Manager 5.2, and Avaya Aura™ SIP Enablement Services*

FOR IMMEDIATE RELEASE: September 29, 2009

COLORADO SPRINGS, CO — TeleMatrix, a leading ISO-9001 and RoHS-certified manufacturer of SIP telephones, today announced that its two-line 9602IP DECT SIP cordless (9602SIP V1.8.90-603) and 3302IP SIP corded phones, and single-line 3300IP (V1.8.82-595) endpoints are compliant with solutions from Avaya, a leading global provider of business communications applications, systems and services.

TeleMatrix VoIP telephones help hoteliers, hospitals, and university/college, customers connect via the Avaya Aura™ Communication Manager and Avaya Aura™ SIP Enablement Services.

“The benefit of Avaya compliance to TeleMatrix customers is significant”, states Jose Quiros, TeleMatrix Chief Operating Officer. “Innovations based on open, standards-based Avaya Aura and TeleMatrix IP telephone platforms help them incorporate new VoIP technology easily and cost-effectively and uncover new possibilities for getting more out of their communications infrastructure, he concludes.”

TeleMatrix is a member of the Avaya DevConnect program—an initiative to develop, market and sell innovative third-party products that interoperate with Avaya technology and extend the value of a company’s investment in its network.

As a Gold member of the program, TeleMatrix is eligible to submit products for compatibility testing by the Avaya Solution Interoperability and Test Lab . There a team of Avaya engineers develops a comprehensive test plan for each application to verify whether it is Avaya compliant. Doing so ensures businesses can confidently add best-

in-class capabilities to their network without having to replace their existing infrastructure—speeding deployment of new applications and reducing both network complexity and implementation costs.

“By offering compliance testing to the many innovative companies like TeleMatrix who are members of our DevConnect program, Avaya promotes fully interoperable solutions that help businesses unleash powerful new possibilities,” said Eric Rossman, vice president, developer relations and technical alliances, Avaya. “They are able to use Unified Communications to connect employees and customers to information from wherever they are, over whatever device they have available – getting more out of their multivendor network and delivering new value to their bottom line.”

About Avaya

Avaya is a global leader in enterprise communications systems. The company provides unified communications, contact centers, and related services directly and through its channel partners to leading businesses and organizations around the world. Enterprises of all sizes depend on Avaya for state-of-the-art communications that improve efficiency, collaboration, customer service and competitiveness.
