

## **June 10, 2009 – Dealers Required To Complete Pre-General Availability (GA) Document.**

### **Region: Global**

TeleMatrix dealers placing new orders for pre-general availability telephone sets are now required to complete and sign a Pre-General Availability release agreement. For example, a dealer is required to review and sign the agreement prior to purchasing new two-line 3302IP SIP corded or 9602IP DECT SIP cordless telephones, which are in inventory, but not scheduled to be released for general availability (standard SIP) until Q3 2009. Please contact your TeleMatrix sales director for PBX specific inter-op schedules. Dealers may contact iPriorityCare or their Regional Sales Director for a list of Pre-GA telephone models and document details.
