

INDUSTRY ALERT:

Are your room phones certified safe?

Please be aware that there are room telephones being sold in the US that are NOT UL and/or ETL Safety Certified (Shock proof and Fire Resistant certificates). You may wish to ask your insurance company to see what this could mean to your property. Here is what to look for on the underside of your phones. No certificate makes you legally liable.

A public awareness announcement provided by your friends at Scitec and TeleMatrix.
